

IN THE CLAIMS:

1. (Currently Amended) ~~A waterfall for~~ In combination with a spa having a container (20) for holding water ~~[[and]]~~ with a top rim (15) ~~on the container,~~ the improvement being a waterfall structure comprising:

~~a spout (13) mounted in the top rim (15) of the container (20), the spout (13) having a narrow and elongated mouth (14) and a top (17) and bottom (16);~~

a plenum chamber (23) having walls (24, 26), a water inlet ([[27]] 39) and a water outlet (30), the outlet being ~~connected to the spout; and~~ formed from the walls (24, 26) of the plenum chamber;

a spout (13) formed from the walls (24, 26) of the plenum chamber as a continuation of the water outlet (30), the spout being mounted in the top rim (15) of the container (20), the spout (13) having a narrow and elongated mouth (14) and a top (17) and bottom (16);
and

a light source (43) attached to the bottom ([[17]] 16) of the spout (13) at the mouth (14) so as to inject light directly into the water flowing out of the spout (13) after it has left the spout (13).

2. (Previously Presented) The waterfall of claim 1 wherein the plenum chamber has a baffle (27) to prevent pressure surges.

3. (Previously Presented) The waterfall of claim 1 wherein the water inlet (29) of the plenum chamber (23) is larger in cross-section than the water outlet (30).

4.-5. (Cancelled)

6. (Currently Amended) The waterfall of claim 4 further comprising a bezel (21) shaped to fit over the [[spot]] spout and light source after it is mounted.

7. (Previously Presented) The waterfall of claim 6 wherein the light source (43) is a flat fiber-optic array.

8. (Previously Presented) The waterfall of claim 1 further comprising a bezel (21) shaped to fit over the spout after it is mounted.

9. (Cancelled)

10. (Currently Amended) The waterfall of claim 1 wherein the water inlet (29) is a separate [[part]] structure from the plenum chamber (23) that fits into and is permanently fastened to the walls (24, 26) of the plenum chamber (23).

11. (Previously Presented) The waterfall of claim 10 wherein the water inlet (29) has an inlet orifice (39) and water pipe connector (37).

12. (Previously Presented) The waterfall of claim 1 wherein the water inlet (29) has a baffle plate (27) mounted some distance from and over the inlet orifice (39), causing water flowing through the inlet orifice to strike the baffle plate and flow around it.
